

The CompWest Difference

CompWest is transforming workers' compensation, one business at a time.

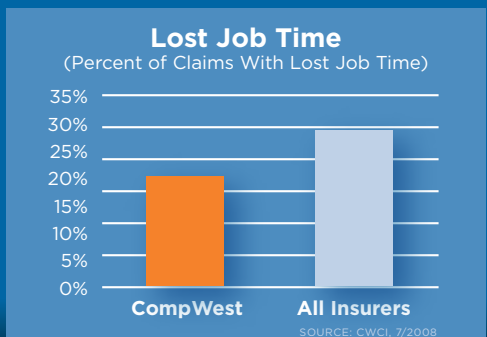

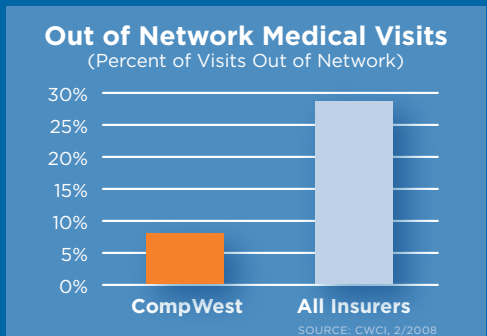

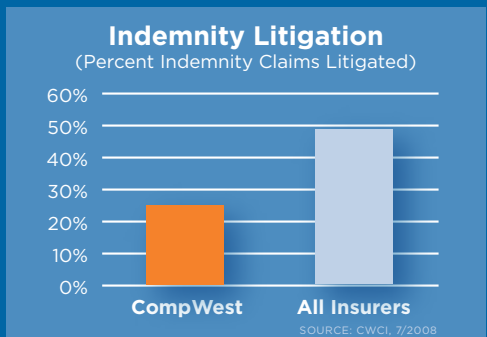

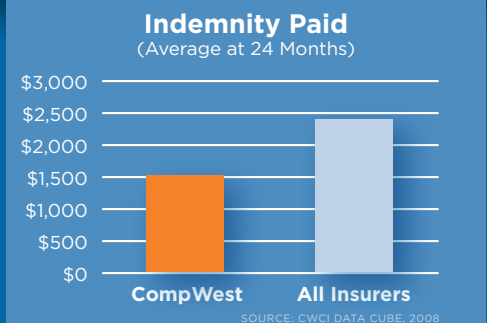

By proactively caring for injured workers and helping business owners improve workplace safety, CompWest has significantly reduced its policyholders' insurance costs. The results are simple: lower premiums, lower experience modifications, and better claims and loss control service.

For years, the workers' compensation industry has made a name and reputation by fighting with injured employees, doctors, lawyers, labor unions, medical networks, and just about anyone connected to an insurance claim. CompWest offers a difference: **EMBRACE** workers injured on the job and expedite their return to work, **EMPOWER** business owners to take control of their workers' compensation costs, and **INVEST** in claim adjusters who provide the best care and guidance.

What has your insurance company done for *you* lately?
