

Driver Safety: Three Points of Contact

The CompWest Difference

CompWest customers are assigned a dedicated loss control consultant to identify and address loss trends while serving as a safety resource.

What are the three points of contact?

This important rule requires at least three points of contact at all times when getting on/in or off/out of a vehicle: two hands and one foot, or two feet and one hand.

How to stay safe

Each year, far too many serious and needless injuries happen to drivers while getting in and out of their vehicles. By using the three-point contact method you will greatly reduce the potential for injuries.

Remember these key points:

- Maintain three-point contact at all times when entering or exiting a vehicle.
- The three-point contact method should only be broken after reaching the ground, vehicle seat or other stable platform.
